SALT LAKE MEN MAKE GOOD IN CERRO GORDO

NIGHT SHIFT ADDED TO RAISE OUTPUT TO TWENTY-FIVE TONS DAILY.

Salt Lake men interested in the old Cerro Gordo property at Keeler, Cal., are doing exceptionally well and if conditions continue to improve considerable more money will be made, according to a recent visitor at the property. Louis D. Gordon of Salt Lake is the chief interest in the property and associated with him are Frank J. Hagenbarth and others, says the Deseret News.

Recently an excellent body of ore was opened up on the 700-foot level of the mine. This ore body is now four and a half feet wide and carries an average of 70 ounces in silver, 4 per cent copper and 10 per cent lead.

From this body 15 tons of ore are being extracted and shipped each day. Arrangements have been completed to put a night shift to work on the ore and shipments in a few days will be at the rate of 25 tons a day. On this ore a comfortable profit is being made and the management has every reason to believe that the body will become much larger as the work progresses.

The property is developed to the 1100 level. It is well equipped and everything is in good condition for the continuance of development work. At present 30 men are employed and as conditions continue to improve it is probable that this number may be increased.

The old slag dump at the property is being screened and the fines and unused material is being marketed at the rate of 10 tons a day. This ore is yielding about \$16 a ton net. The management also has another excellent source of revenue in the zinc carbonate that is being shipped at the rate of 10 tons a day. This is being taken from the mine and runs 35 per cent zinc. This product is being sent to the La Harpe Smelting company at La Harpe, Kan.

Mr. Gordon and his associates have taken over the bonds of the original company, with the proviso that they may be bought back should the company so decide. Whether this will be done is something that has not been decided.

At Darwin it is declared that a number of the properties are showing excellent results. The Christmas Gift mine has just made a strike on the 275-foot level and from this the company is shipping at the rate of 15 tons of ore a day. This is a lead carbonate ore that carries 45 per cent lead.

The Custer mine in the same vicinity is reported to have again picked up the ore body. Last year the company shipped \$50,000 worth of ore and then lost it. Since then the fault system has been worked out and the company is again in the ore body. This ore carries about \$100 a ton in lead and silver values.

Favorable reports are also being received from the Lucky Jim and Domingo mines, both of which are shipping.
